

Q System to InFusion Upgrade Solution (Q to I)

Controllers:

InFusion is Vantage's most advanced automated lighting control system. Existing Q Systems may be upgraded to InFusion Systems with minimal cost to the homeowner and limited effort for the Vantage dealer. Customers who upgrade to InFusion will enjoy several benefits including mobile access, LED dimming and control, advanced keypad technology, new integration capabilities, and new product warranty.

The InFusion control system exceeds Q in every way, boasting enhanced lighting control; A/V, comfort, and shading integration; mobile app control; advanced keypad functionality; and much more. The InFusion platform is a future-ready system, one that will provide the experience end-users are expecting for years to come.

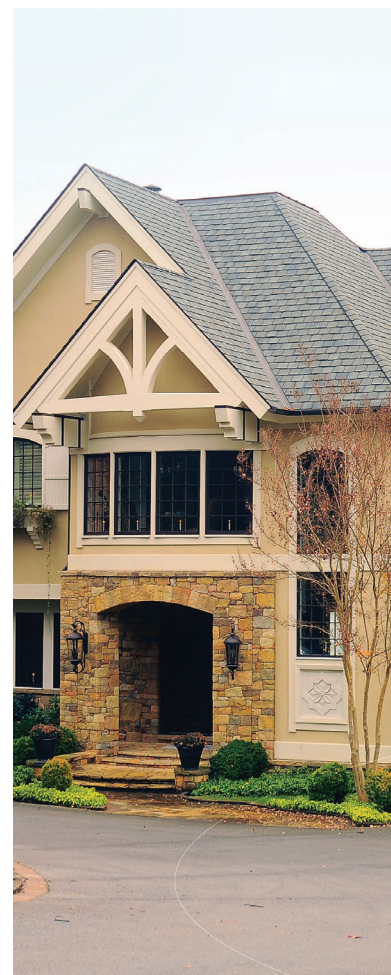

Homeowner Benefits:

- Access to the newest keypad and lighting control innovations
- Provides an integration platform for:
 - A/V, comfort, and shading
 - Mobile app control
 - Advanced keypad functionality
- Factory certified programming
- System health check
- Free factory checkup within 1 year
- Five-year warranty for new products
- Improved serviceability of product and platform
